- 1. Use, as an active ingredient, in or for the preparation of a composition, of an efficient amount of at least a cotton honeydew extract; the extract or the composition being intended for the care of keratin substrates.
- 2. Use, as an active ingredient, in or for the preparation of a composition, of an efficient amount of at least a cotton honeydew extract; the extract or the composition being intended to protect keratin substrates, and particularly to protect skin and/or hair against all types of external aggressions.
- 3. Use, as an active ingredient, in or for the preparation of a composition, of an efficient amount of at least a cotton honeydew extract; the extract or the composition being intended to protect keratin substrate synthesis, and particularly keratins.
 - 4. Use, as an active ingredient, in or for the preparation of a composition, of an efficient amount of at least a cotton honeydew extract; the extract or the composition being intended to reinforce the cutaneous barrier of the skin and/or to reinforce the protection of hair.
 - 5. Use, as an active ingredient, in or for the preparation of a composition, of an efficient amount of at least a cotton honeydew extract; the extract or the composition being intended to nourish keratin substrates.
 - 6. Use, as an active ingredient, in or for the preparation of a composition, of an efficient amount of at least a cotton honeydew extract; the extract or the composition being intended to maintain and/or protect natural or synthetic fibers.

7. Use according to any of the preceding claims characterized in that cotton honeydew extract contains sugars such as glucose, fructose, saccharose, trehalose, melezitose, trehalulose and inositol.

- 8. Use according to any of the preceding claims characterized in that the sugars present in cotton honeydew extract are 30 to 40 % fructose, 20 to 30 % glucose, 3 to 20 % saccharose, 0 to 10 % melezitose, 0 to 6 % trehalulose, 0 to 10 % trehalulose and 0 to 12 % inositol as a percentage of the total quantity of sugars present in the honeydew.
- 9. Use according to any of the preceding claims characterized in that cotton honeydew extract is used in proportions between 0.0001 % and 20 %, by weight, relative to the total weight of the composition
- 20 10. A cosmetic and/or dermatological and/or pharmaceutical composition characterized in that it contains, as an active ingredient, in a cosmetically, pharmaceutically or dermatologically acceptable medium, at least a cotton honeydew extract.
 - 11. Composition according to claim 10 characterized in that cotton honeydew is present in the composition at a concentration between 0.0001 % and 20 %, by weight, relative to the total weight of the composition, and preferentially at a concentration between 0.001 % and 10 %, by weight, relative to the total weight of the composition.
- 12. Composition according to any of claims 10 or 11, characterized in that it is in a cosmetic and/or dermatological composition adapted to topical cutaneous

application through an acceptable cosmetic or dermatological medium.

Composition according to any of claims 10 or 12, characterized in that the extract is dissolved beforehand several cosmetically or pharmaceutically or acceptable solvents such as water, ethanol, propanol or isopropanol, propylene glycol, butylene glycol, glycol, dipropylene diglycols ethoxylated propoxylated, cyclic polyols, petroleum jelly, vegetable oil or any combinations of these solvents.

- 14. Composition according to any of claims 10 to 12, characterized in that the extract is beforehand dissolved in a cosmetic or pharmaceutical vector such as liposomes or is adsorbed on powdery organic polymers, mineral supports such as talc and bentonites, and more generally, dissolved in, or fixed on, any cosmetically or pharmaceutically acceptable vector.
- Composition according to any of claims 10 to 12, 15. characterized in that it can take the form of an aqueous, hydro-alcoholic or oil solution; or the form of an oilwater-in-oil emulsion multiple in-water or or in used emulsions. They can also be as creams, suspensions or as powders. These compositions can also be more or less fluid or solid and can take the form of creams, lotions, milks, serums, ointments, shampoo, gel, paste and mousse. It can also take a solid form like a stick.
 - 16. Cosmetic process of treatment for the care of keratin substrates, and in particular for the skin and hair, consisting in applying to keratin substrates, and in particular to the skin and/or hair, an effective

amount of a composition such as defined according to any of claims 10 to 15.

17. Cosmetic process of treatment in order to protect keratin substrates, and more particularly to protect the skin and hair against all types of external aggressions, consisting in applying to the surface of keratin substrates, and in particular on the skin and/or hair, an effective amount of the composition such as defined according to any of claims 10 to 15.

15

18. Cosmetic process of treatment in order to reinforce the protection of the skin, and/or to increase keratin synthesis and/or in order to nourish keratin substrates, and in particular the skin and hair, consisting in applying, to the skin's surface and/or hair, an effective amount of the composition such as defined according to any of claims 10 to 15.
